

Arctic 28 SAR Patrol boat

The A28 is built on a multi-purpose hull that can be customized to everything from a luxury tender, to a patrol boat, or to a SAR fast boat

The material used in our boats is HMWPE, High Molecular Weight Polyethylene, which is a durable polymer. The abrasion resistance of this material is superior and is suited for rough use and also for oil spill recovery. The sea keeping characteristics of our boats resemble the characteristics of RIB boats.

The boat interior is spacious thanks to D-shaped fenders. Unlike RIB boats, the pontoons of the RBB (Rigid Buoyancy Boat) boat never loosen up or flatten, making the boat safe and resilient. The RBB boat has a very low life-cycle cost compared to other boat types due to the reduced need for repair and overhaul.

This boat has an aluminum steering console that can be customized to your needs. There is room for 4 jockey seats and in the front locker, there is plenty of storage space.

Equipment

Work lights, CO₂ righting bag, Radar, Sonar, Steering servo, Air suspended jockey seats

Specifications

Overall length excl. engine	8,9 m (28 ft)
Beam	2,6 / 3,1 m
Draft to props	0,64 m
Weight (excl. engines)	2500 kg
Individual capacity	18 persons
Fuel capacity	540 L
Construction	HMWPE
Classification	B - OFFSHORE
Max speed	40 kts
Outboard engines	2x175 - 200 hp

Specifications may be changed without prior notice.
