

Job vacancy

Production Manager – Boat Production

Employment type: Full-time | **Start date:** Immediately

Location: Hybrid – mostly in Parainen / Loviisa

Arctic Boats designs and builds workboats, search and rescue boats, and boats for patrol and utility applications, used by fire brigades, police, coast guards, and rescue services across Europe. Our boats are known for their durability and long service life and are used by organizations such as the German Sea Rescue Society (DGzRS), the Swedish Sea Rescue Society, the Finnish Rescue Services Agency, and the Estonian Coast Guard, among others.

We are now looking for a **Production Manager** to coordinate our production process – from design handover through to the finished boat. The ideal candidate is a hands-on, organized problem-solver who is comfortable being the link between design and production. In this role, you will:

- **Coordinate the overall production process between our design partner and production workshop.**
- **Monitor build quality and ensure high standards of workmanship and compliance with Arctic Boats' specifications and customer requirements**
- **Handle purchasing to some extent in support of ongoing production needs.**

What we offer

Join a small, specialized boatbuilder where you'll work closely with an experienced team and take real ownership of delivering each boat to a high standard. Our boats serve rescue services, coast guards, and police forces across Europe, and every project brings new technical and practical challenges. Expect short decision paths, variety, and the freedom to find solutions that make a real difference.

How to apply

Please send your application to jobs@arcticboats.fi as soon as possible.

Questions about the role?

Contact us at jobs@arcticboats.fi or call us directly at **+358 40 043 1025** - we're happy to talk things through before you apply.

We expect:

- Experience in boatbuilding or workboat production.
- Fluency in English – Finnish is a great plus.

It's an advantage if you also have:

- German language skills.
- CAD design skills.
